

Monodzukuri (Manufacturing) Mission to Bangkok, Thailand

Company Profile and Business Meeting Sheet

Company name MITSUMOTO RASENKAN KOGYO CO., LTD	Representative: Hiroshi Takashima
Address: 1-2-37 Nagata, Joto-ku, Osaka City	Person in charge: Hiroshi Takashima
TEL: +81-6-6968-2037	
FAX: +81-6-6968-7475	Title: Representative Director
URL: http://www.mitsumoto-bellows.co.jp/ (Japanese only)	E-mail: takashima@mitsumoto-bellows.co.jp

◎ Name of technology/product (Please describe the technology/product you will introduce on this mission.)

We design, manufacture and sell metallic bellows and flexible tubes, solely on a "build-to-order" basis.

While standard molded bellows are made of SUS316L, we accept orders to manufacture bellows of special materials, such as hastelloy C-22, inconel 625, M Monel and pure nickel. The minimum order quantity is one piece. We manufacture bellows in sizes of $\phi 32$ – $\phi 850$, with customers' desired dimensions (adjustable in units of 1 mm), with no charge for mold. Bellows with low spring constant are manufactured using thin sheets (thickness: 0.1 mm, 0.15 mm, 0.2 mm and 0.3 mm). We also develop multi-layered bellows (2 ~ 4 layers) that offer both high pressure resistance and low spring constant. If you have vibration-related trouble, Super Bellows developed by Mitsumoto Rasenkan Kogyo offer a solution in vibration absorbency. We accept orders to manufacture bellows that meet customers' specifications from low to high temperatures and from vacuum to high pressure. The minimum order quantity is one piece. Mitsumoto Rasenkan Kogyo's products have found applications in the absorption of vibration/thermal expansion, as well as in expansion joints for variable-angle installations etc., mechanical seals, bellows valves, shaft seals, accelerators, pressure-activated equipment, agitators, vacuum seals etc.

Bellows

Flexible tubes

Please choose topics for business meeting.

- Product / technology sales** **Product / technology introduction**
 Identifying business partners
 Dealer / agency sales **Processing on commission**
 Joint development **Other ()**

Please write your request, if any.

We would like to sell our products/technologies to researchers engaged in development who are having difficulties finding manufacturers that will undertake small-lot production for R&D and other purposes.
